ACTIVE DIRECTORY

Real Time Auditing for Active Directory

BLUE LANCE

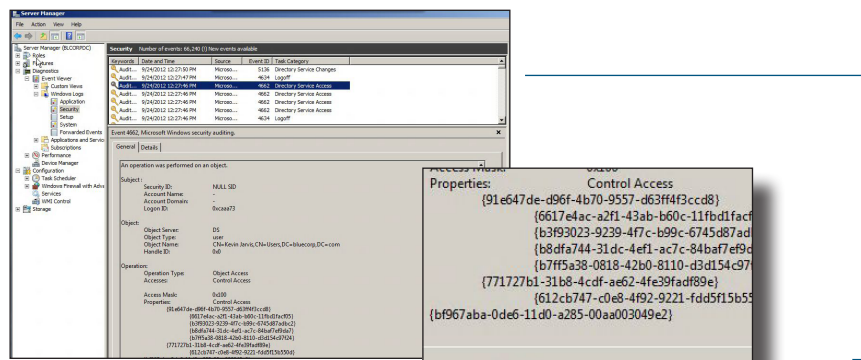

THE CHALLENGE

When it comes to Active Directory (AD) configurations, a single change can put your organization at risk, affecting productivity, risking security breaches and threatening non-compliance with critical government regulations such as Sarbanes-Oxley (SOX), Payment Card Industry (PCI) and the Health Insurance Portability and Accountability Act (HIPAA). Organizations need to be notified—in real-time—of critical changes to Active Directory yet built in Active Directory auditing capabilities are burdensome, puzzling and lack centralized auditing and reporting. Furthermore, analysis of these security logs requires enormous resources, even then, stops short of providing a complete picture of AD activity.

THE SOLUTION

LT Auditor+ for Active Directory captures all the essential information for any modification in real time. LT Auditor+ for Active Directory tracks, audits, reports and alerts on the changes that impact your directory showing who made what change, when it was made and where it was made from. LT Auditor+ for Active Directory provides the intelligence required to audit user and administrative activity in accordance with organizational policies to demonstrate compliance with regulations and guidelines such as Sarbanes-Oxley (SOX), Payment Card Industry (PCI), the Health Insurance Portability and Accountability Act (HIPAA) and many more.

Transform your cryptic & chaotic logs to clear, actionable reports
