

LT AUDITOR+

WINDOWS SERVER

Real Time Auditing for Windows Server

BLUE LANCE

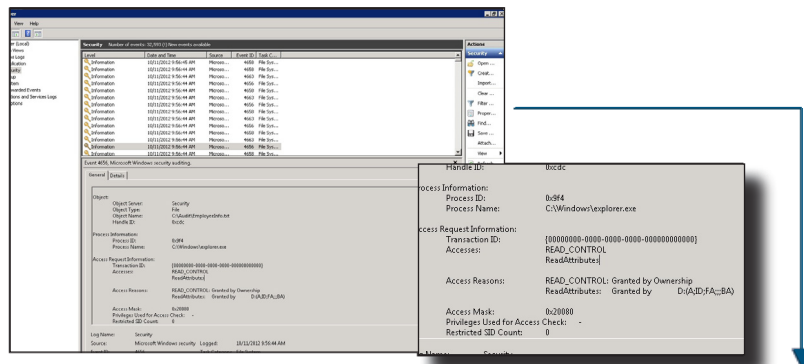

THE CHALLENGE

An organization's Windows file servers contain critical and sensitive information. Typically, it is very difficult to track and enforce who has access to which documents and most violations of information security policies and misuse of access rights go undetected. A single unintended change or inappropriate access can put your entire organization at risk, affecting productivity with service interruptions, costly security breaches and non-compliance with critical government regulations such as Sarbanes-Oxley (SOX), Payment Card Industry (PCI) and the Health Insurance Portability and Accountability Act (HIPAA).

THE SOLUTION

LT Auditor+ for Windows Server is designed to provide detailed auditing and monitoring of Windows server activity — delivering clear, concise, actionable intelligence. LT Auditor+ for Windows Server goes beyond native Windows event logs and interacts seamlessly and unobtrusively with the operating system to capture Successful/Failed Authentications; Successful/Failed File and Folder Operations; and Removable Storage Activities including flash drives. LT Auditor+ for Windows Server delivers a bullet-proof audit trail, through easy-to-read forensic reports and real-time alerts, to precisely identify Who did What, from Where and When.

Transform your cryptic & chaotic logs to clear, actionable reports

FEATURES

- 24x7 Monitoring with real-time alerts
- Management Summary reports with drill-down capability
- Over 100 security and compliance report templates
- Translation and correlation of raw event log data into plain English reports and alerts
- Multiple report formats including Excel, Word, HTML and PDF
- Automatic report scheduling and delivery
- Audit files, folders, user authentications and USB storage devices
- Automatic archiving of Windows native event logs
- Enterprise-wide data consolidation
- Comprehensive Auditing with Granular filtering
- Audit the Auditor
- Robust, fault tolerant and load balanced architecture
- Multi-Manager-Agent architecture
- Automatic audit policy deployment
- Built-in agent status and health monitoring

LT AUDITOR+ WINDOWS SERVER

Real Time Auditing for Windows Server

BLUE LANCE

BENEFITS

LT Auditor+ for Windows Server is configurable to fit seamlessly into any organization, large or small. LT Auditor+ allows your organization to immediately reap the benefits of continuous security and compliance monitoring by enabling your organization to improve incident response time, provide comprehensive audit reports, meet compliance control transformation requirements, ensure privacy, confidentiality and integrity, all while saving time and money.

Reporting with LT Auditor+ for Windows Server has never been faster and easier. Through centralized reporting, users can consolidate data or create forensic analysis reports organization-wide. LT Auditor+ for Windows Server offers over 100 standard reports that target both security and compliance, all while adding drill-down capability to individual events. Additionally, new reports may be created and customized to display only required details and scheduled for automated delivery.
